

A Panther 9'x18' Oval Marquee is used each year as the Headquarters Tent at the Eastern Primitive Rendezvous.

OVAL MARQUEES

You see a lot of these sprouting up at rendezvous and historical re-enactments. They're not as space efficient as the rectangular marquee, (a 10'x14' oval marquee has 30% less square footage than its rectangular counterpart), but the rounded ends make the tent very attractive. So, while you don't see too many of these used for stores they've become quite popular for family camps!

You get the same superior design and reinforcements as in our rectangular marquee, and you may choose between straight or slanted walls.

* STANDARD PEAK HT. IS 10 FEET, EAVE HT. IS 6' FOR EASY ACCESS!

OVAL MARQUEE SIZE	Flame Retardant	Sunforger	10.38 oz. Sunforger w/Flame Retardant	13 oz. Sunforger w/Flame Retardant	10" Sod Flap	For Scallop Style E or G (See Page 14)	Length of Ridge Pole (Required)	# Of 6' Perimeter Poles Needed	Complete Set-Up Pkg. (For 6' Walls)	Medieval Color Option (Pg. 9)

Our standard 6' walls can be raised 6" or 12" for \$60. Your peak ht. will be raised by the same amount, and the set-up package will cost an extra \$35.00.

* **SEAM ENGINEERING (Pg. 16)** is available on Oval Marquees with a ridge length of 9' or 12' (see chart above). When seam engineered, a 9' ridge becomes about 8'3", and the overall tent is 9" shorter. A 12' ridge becomes about 11', and the overall tent is about 1' shorter. (A 15'x27' Oval Marquee becomes about 15'x26' when seam engineered. Call us to see if your set-up package is affected by seam engineering).

SET-UP PKGS. - Included are flanged rubber washers for perimeter poles to help seal grommets from leakage around your pins.

SLANT WALLS - for 9' & 13' wide - \$78, for 15' & 18' wide - \$86

STORM ROPES - 3/8" manila for over-the-roof. Extra protection in a storm. \$10.00

ROOF VENTS - Installed on flat side. 24"x48"....\$60 30"x60"....\$75 (See Pg. 15)
