

THE TRADER'S TENT

This is a cross between a marquee and a wall tent. The ends of the roof are straight like a wall tent but the 6' walls are detachable and move-able like our marquee tents. The peak is 10' on this tent. The flat end means that it is MUCH EASIER to have a fly coming off the end of your tent than with a marquee. You'll also have fewer perimeter poles to carry because you'll only need them on the sides, and not on the ends. The tradeoff is a longer ridge pole.

This design is authentic to at least the 1700's and probably much earlier. The wall tent and the marquee are among the oldest types of tents around, and there were countless variations of each style.

Our standard Trader's Tent comes with a straight edge and no braid on the valance. If you'd like scalloping instead there is an extra charge. See page 14 for 8 scallop designs and 16 braid colors to choose from! See below for pricing.

Constructed with the same reinforcements and design features as our marquee. 6'6" or 7' walls for the sizes below costs \$60.00 (This will also increase the ht. of your center poles).

Add \$35 to the set-up package price for tents with 6'6" or 7' walls.

SEAM ENGINEERING (Pg 16) - Since this tent has no poles on the end, only the long sides will be altered. The 14'x18' would turn out approx. 14'x16'6". The 16'x24' would be approx. 16'x22'. This will increase the cost of your set-up package. (Call for pricing).
