

MEDIEVAL TENTS

(See pages 12-23 for our Marquee Tents with color option!)

THE REGENT PAVILION

Only 5 poles,
8 ropes and
some tent stakes
are needed to
set up the
Regent!

A very popular style throughout the ages, the Regent is fabulous for an average sized family with gear. It sets up with one center pole and four corner poles. Walls are 6' high on our standard Regent. For 7' walls add \$60.00. This will raise the peak by one foot.

The roof portion is square while the base of the slanted walls is an octagon. This gives you LOTS OF ROOM without having to cart around all those poles!

The Regent is a one piece tent, made with two doorways to give you plenty of ventilation on hot days! Above each door we sew a flap so that you can add a canopy fly on either, or both sides of your tent. These flaps are standard on all Regent Pavilions and they have D-Rings sewn underneath for attaching the fly. If you order the fly it will drastically increase your outside socializing area. We make these the same width as the eave of your tent and they extend 12' forward. The flies attach above your doorway with snaps and D-rings and two matching grommets to go over your tent's corner pole pins. The front edge of the fly uses two 6' upright poles, and a central prop pole provides slope for rain. All three of these poles, as well as ropes and stakes are included in the Set-Up Package for the canopy fly.
